### LoE Glass

Argon insulated tempered LoE glass reduces heat flow for energy efficiency

### Blinds Between the Glass

Blinds between the glass feature a cordless tilt, raise and lower operation. The mini blinds are sealed between 2 panes of glass within the door.

### Grilles Between Glass (GBG)

Flat white  $\frac{3}{4}$ " grilles are installed between the two layers of Low-E Argon insulated glass. Grilles between the glass are available in 10 & 15 lite patterns. They create a classic look that allows for easy cleaning while providing excellent energy efficiency.

### Simulated Divided Lites (SDL)

Simulated divided lites give you the classic look and feel of a true divided lite door. Our 100% composite simulated divided lite grills are fixed permanently to both the interior and exterior glass surface, providing higher energy efficiency than individual panes of glass.

### PET DOOR

**Ideal for pets weighing up to 90 lbs. and up to 10 in. wide**

Pet Door Opening Size: **10-1/4" x 15-3/4"**

- The Pet Door features a unique magnetic closure system that enhances wind resistance and ensures a tight seal when the door is not in use.
- Fully integrated, double-walled flexible pet door comes with a rigid lock-out panel to keep out unwanted pests.

Visit [Homedepot.com](http://Homedepot.com) for door and purchase options.

### HANDLE

Satin Nickel handle set comes standard with every door.

\*Brown and White handlesets are optional and available through special order or [homedepot.com](http://homedepot.com)

### SCREEN

\*Screens sold separately  
The MP Doors 36" Sliding Screen Door is a great addition to any home. The screen is available with a composite frame or metal frame. This screen is reversible. Fiberglass mesh screen provides protection from insects while allowing fresh air and light to flow. A 30" screen is also available to fit all 60" x 80" models.
