- Energy Star

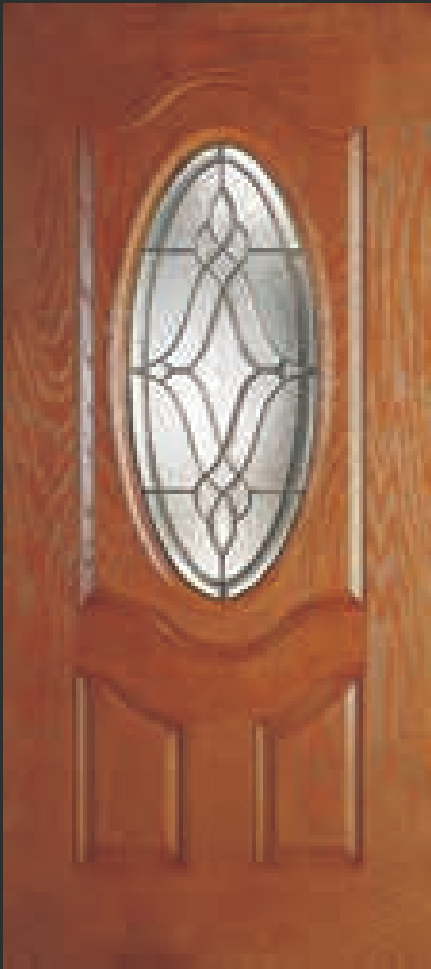

Fiberglass Reinforced Door Skins

- Made of high compression-molded fiberglass to provide superior protection and durability
- Fiberglass skins won't dent or delaminate like steel
- Surfaces are easy to stain or paint, and easy to clean
- Available in the following woodgrain and smooth options:

\* Shown with stain

Internal Wood Lock Block

Deep Embossed Panel

- Deep embossed panels create beautiful shadow lines and the look of a real wood door

Warranty

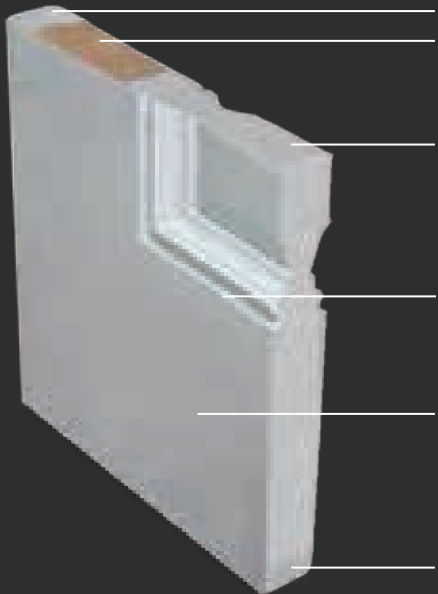

- Lifetime limited warranty

Waterproof Composite Top & Bottom Rails

- No exposed wood. Will not absorb moisture and will not rot

Waterproof Composite Stiles

- Stronger screw holding capability
- Better performance than wood stiles - will not delaminate, warp, rot or splinter
- Sealed edges and corners
- No exposed wood

Composite Stile  
LVL Reinforcing

CFC Free Polyurethane Core

- Environmentally friendly - 100% CFC free
- Rigid core to provide dimensional stability
- 6X more energy efficient than wood doors

Deep Embossed Panel

Pre pigmented smooth white skin  
requires no painting and will not yellow

Composite Rail

MasterPiece Entry Doors with Hydroshield Protection are engineered to provide protection against water infiltration, allowing you to enjoy the look of real wood without the worry about warping, rotting and delamination. The powerful combination of fiberglass door panels edged in waterproof composite material and full composite frames repel water, are low maintenance and look great year after year.

Available in both smooth and textured grain finishes and a variety of stain and paint colors, a MasterPiece Door will compliment any architectural style.

Door Frame

Astragal

Aluminum  
Composite Sill

Do you know?

Composite Frame system can help increase the energy saving U-Value by 10% on your door unit. Why put a NON rot energy saving door in a wood frame?

Fire Tested...

Masterpiece Composite Fire Rated door units have past 20 minutes Warnock Hersey fire rating

# ROYAL FLUSH 3/4 LITE

Flush Glazed or Open and Beaded refers to how a piece of glass is set into a door slab. A Flush Glazed finish creates a clean, uninterrupted look. The bead is premoulded and blends with the door slab surface for a smooth seamless line. The Flush Glazing keeps the glass unit water and weather resistant for years to come. A removable stop allows the glass to be easily installed or replaced if needed.

Blinds Between the Glass

Blinds between the glass option gives you a tilt, raise and lower operation. Available in clear IG and Low-E, Sealed glazing units protect the blinds from dust and damage and help maintain the clean seamless look of your door. Our sealed blinds between the glass glazing units also help maintain and maximize your energy efficiency. You are in control of your privacy, the amount of light coming into the home, and can keep the full view when you choose to enjoy it.

Grilles Between Glass (GBG)

Flat white 3/4" grilles are installed between the two layers of Low-E Argon insulated glass. Grilles between the glass are available in 10 & 15 lite patterns. They create a classic look that allows for easy cleaning while providing excellent energy efficiency.

Simulated Divided Lites (SDL)

Simulated divided lites give you the classic look and feel of a true divided lite door. Our 100% composite simulated divided lite grills are fixed permanently to both the interior and exterior glass surface, providing higher energy efficiency than individual panes of glass.

Choose the style of your home with our decorated glass options.

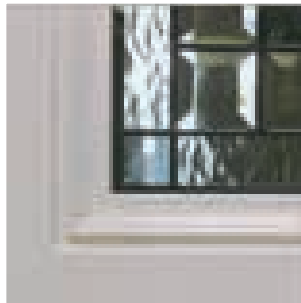

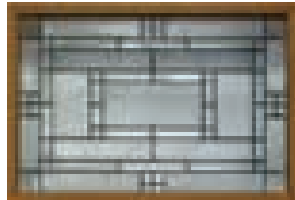

MasterPiece Full Lite and 1/2 Lite Doors are flush glazed, giving a clean finished look without the unattractive glass frame of traditional glass inserts. The glazing bead is premoulded and is flush with the door slab surface for a smooth seamless weather resistant finish. If needed, the glazing bead can be easily removed for glass replacement.

### CRAFTSMAN OPTIONS

All Craftsman door include a custom factory glass insert.

#### Flush Glazed Glass Insert
